Innovative and sustainable – Implenia among the top three finalists at the German Construction Award 2022

Glattpark (Opfikon), 1 June 2022 – Implenia has been named as one of the best and most innovative construction companies in Germany. Construction and real estate services provider Implenia Germany was elected as one of the top three finalists out of 170 entries in the category over 500 employees at the German Construction Award 2022. The competition, which has been running since 2013, seeks to identify and honour the industry’s pioneers: companies that are well organised, have good control over their processes, and use resources sustainably.

“We are very proud to be among the top three at the German Construction Award 2022 as one of the best large construction and real estate services providers in Germany. It vindicates our claim that our expertise in managing large, complex real estate and infrastructure projects, combined with a clear focus on sustainability, helps us stand out from the competition,” says Matthias Jacob, Country President Germany at Implenia. “But we don’t just see this success as a reward for our innovative and sustainable corporate management. We also take it as an encouragement for us to get even better.” By using BIM (Building Information Modeling) and Lean Construction for planning and execution, Implenia ensures that its projects are carried out efficiently and to its clients’ high standards. Current examples include [the A7 Altona noise abatement tunnel in Hamburg](#) and the residential neighbourhood at [Südcampus in Bad Homburg](#).

This year, for the first time, the German Construction Award (*Deutscher Baupreis*) was awarded under the auspices of the Federal Ministry of Housing, Urban Development and Building. The awards ceremony took place on 31 May 2022 at the digitalBAU 2022 trade fair in Cologne.

Participating companies had to go through an extensive three-stage application process. They were judged by an experienced jury of experts, while the University of Wuppertal was in charge of evaluating the relevant data.

A young talent award for innovative, digital solutions in the construction industry was also presented at the digitalBAU 2022 trade fair. This prize went to a young Implenia BIM specialist for her programming of a BIM-supported application tool to optimise the call-off process for building materials.

As Switzerland's leading construction and real estate service provider, Implenla develops and builds homes, workplaces and infrastructure for future generations in Switzerland and Germany. It also offers tunnelling and related infrastructure projects in further markets. Formed in 2006,

the company can look back on around 150 years of construction tradition. The company brings together the know-how of its highly skilled development, planning and execution units under the umbrella of an integrated leading multinational construction and real estate service provider. With its broad offering and the expertise of its specialists, the Group realises large, complex projects and provides client-centric support across the entire life cycle of a building or structure. It focuses on client needs and on striking a sustainable balance between commercial success and social and environmental responsibility. Implenla, with its headquarters in Opfikon near Zurich, employs more than 8,000 people across Europe and posted revenue of CHF 3.8 billion in 2021. The company is listed on the SIX Swiss Exchange (IMPN, CH0023868554). More information can be found at [implenia.com](https://www.implenia.com).
